

Black Friday Deals

Unix Tutorial

It's Black Friday, meaning there's lots of great deals online – hardware, software and hosting.

Here's just a few things I really liked:

- [Online.net \(where I rent a few dedicated hosts\) have 50-70% discounts on great servers](#)
- [WP Engine have 5 months free for new customers – Cyber Weekend](#)
- [Tunnel Bear VPN have a Black Friday discount](#) – added to yearly plan means \$49.99 instead of \$119.88 per year

Have a great weekend!
