

Confirm VMware Tools version

```
greys@ubuntu:~$  
greys@ubuntu:~$ vmware-toolbox-cmd --version  
10.2.0.1608 (build-7253323)  
greys@ubuntu:~$  
greys@ubuntu:~$ █
```

If you need to find out the version of **VMware Tools** running in a remote [VM](#), here is the command line to do it:

```
greys@ubuntu:~$ vmware-toolbox-cmd --version  
10.2.0.1608 (build-7253323)
```
