

# OpenMediaVault Default Login

## OpenMediaVault

With [Debian 10 Buster](#) release out of the way, next major release of OpenMediaVault – **OMV5** – is still on track for Q4/2019 release. This makes it a perfect timing to refresh install procedures in my mind and to capture the default login.

## OpenMediaVault Default Login

- Username: **admin**
- Password: **openmediavault**

### How To Reset Admin Password in OpenMediaVault

You may remember, I have a post explaining [how to reset admin password in OpenMediaVault](#) – you still need ssh access to the server as regular user though.
